

How to make magic binoculars...

1. Collect 2 cardboard tubes.

2. Add a strip of double sided tape or you could use glue.

3. Join your 2 tubes together to create a pair of binoculars.

4. Paint or decorate your binoculars. Get really creative!

5. Use a pencil to make a hole on the side of each tube.

6. Thread ribbon through each hole to make a strap.

7. Look for magic! For this step to work you have to REALLY REALLY believe that you will see magic. Go deep into your imagination and there you will find lots of magic. Then you will be able to be just like Betty and see magic everywhere you go!
